How THT Ltd's Boiler Care works

To qualify for the Toasty, Healthy or Total Home boiler care plans, you must have an initial boiler service and system health check. This would be chargeable at £100 + VAT.

As part of this service, corrosion inhibitor may be added to your heating system, if the engineer believes it is required. There is a cost of £27.99 + VAT for this. There is no labour charge.

Repairs arising as a result of the initial boiler service and system health check must be completed at your cost before you may join the boiler care plan.

Your cover begins as soon as your first monthly payment is received and after the initial 2-week (after signing up) exclusion period has passed.

Payments must be made monthly by Direct Debit using GoCardless. You will be sent a link to set this up.

THT Ltd reserves the right to refuse cover after the initial boiler service and system health check. Reasons for exclusion may include, but are not limited to, the age of the boiler, or because spare parts are no longer available.
